

Our Team of "Sister" Companies

Industrial Fiberglass Specialties

Manufactures and markets corrosion resistant composites to other manufacturers, commodity distributors and OEM's.

FiberSystems

Manufactures and markets corrosion resistant composites to end users, contractors, and engineers. Also, FiberSystems is the channel for all field service activities; including pipe, duct and support installations.

International Piping Systems (IPS)

Manufactures and markets turn-key piping systems; including directional bore, slip linings, and buried long distance piping runs.

Pipe Supports, Inc.

Engineers, designs, manufactures, and markets a complete line of pipe and duct supports, guides, hangers, anchors, etc. Includes providing in-house FEA analysis of piping systems and supports.

Response Metal Fabricators (RMF)

Heavy and light metal fabrication; including all the alloy metals. Includes U.S. wide field installations of metal fabrications, piping, duct, vessels, and buildings. SMACNA union with union label available.

Response Piping System (RPS)

UA pipe fitters contractor. Covered by both local and national agreements. Can provide U.S. wide design, pre-fabrication and spooling and installation of all types and grades of piping materials.

Science/Electronics

Designs, engineers, and markets data loggers and data acquisition equipment. Maintains an NIST repair lab for electronic and controlled temperature equipment to board level.

International Reactor

Engineers, designs, and provides R&D services for chemical process plants. Manufactures and markets agitator reactor equipment and systems; including complete multi-million dollar pilot plants.

Earth & Atmospheric Sciences

Engineers, designs, and installs meteorological equipment (i.e., rain, snow and wind speed instrumentation, temperature, measurements, solar generation, etc.). Emphasis is on complete systems.
